CAREER OBJECTIVE:

To obtain a challenging opportunity where I can effectively utilize my software testing expertise and technical skills to contribute to organizational growth, while continuously enhancing my knowledge in quality assurance, API testing, and financial domain applications.

PROFESSIONAL SYNOPSIS:

- Software Test Engineer with **3+ years of experience** in **manual and basic automation testing** across **web and mobile applications**.
- Hands-on experience in **API testing using Postman (manual and automation)**, including successful implementation of API automation collections.
- Strong experience in testing applications related to **international remittance, forex, WPS, transaction processing, and AML screening systems**.
- Proficient in **Agile methodologies**, with solid understanding of **SDLC, STLC, and Defect Life Cycle**.
- Extensive experience in **functional, regression, sanity, smoke, re-testing, globalization, GUI, and browser compatibility testing**.
- Experienced in **testing multiple third-party service provider APIs** used for **international money transfer and remittance workflows**.
- Actively participated in **requirement collection and analysis from the client side**, ensuring clear understanding of business workflows.
- Strong expertise in **test scenario creation, test case development, execution, and defect tracking** using JIRA.
- Experience in **providing application workflow demos to clients and internal stakeholders** after project completion.
- Provided **project knowledge transfer (KT) and technical guidance to junior QA engineers**.
- Experienced in **database testing using MySQL**, including validation of data integrity and backend verification.
- Knowledgeable in **performance and load testing using JMeter**.
- Regularly prepared and maintained **daily and weekly status reports** for project tracking.

TECHNICAL SKILLS

- | | |
|--|--|
| • Operating Systems | : Windows 7,8,10,11,UNIX |
| • Technologies | : Postman,JMeter,JIRA,Excel,Json,Git,GitLab,GitHub |
| • Databases | : MYSQL, Oracle |
| • Languages | : SQL,HTML,CSS, JAVA |
| • Project Management Tool | : MS-Excel |
| • Requirement Traceability Matrix | |

WORK EXPERIENCE

Senior Quality Assurance Engineer

Distinct Infotech Solutions

(Feb 2024 - Present)

- Developed **Test scenarios** and **Test cases** for international money transfers and currency exchange.
- Configured **Test environments** for accurate simulation of cross-border transactions and currency conversions.
- Collaborated with stakeholders to analyze requirements for **money transfers, currency exchange**, and customer onboarding.
- Managed defect processes, including logging, tracking, and resolution, and conducted regression testing to ensure defect fixes.
- Created and executed test scenarios for **Anti-Money Laundering (AML)** analytics and risk profiling.
- Analyzed AML requirements and fraud detection rules to enhance test planning.

Test and Implementation Engineer

Smart HMS Solutions Pvt Ltd

(Sept 2022 -Sept 2023)

- Involved in designing **Test Scenarios** and **Test Cases**.
- Verifying **Test Environment**.
- Understanding and Analyzing Test Requirements.
- Organizing, monitoring **defect management** process, handling changes and conducting regression tests.
- Participate in all sprint activities including, **daily stand ups**, grooming session, planning, **requirements gathering, story writing**, and solution design sessions.
- Deriving Test Scenarios, Documenting **Test Cases** and Collecting Test Data for **Functional Testing**.
- Updating **Traceability Matrix** Documents.
- Creating Test Batches, Executing Test Cases and **Reporting Defects**.
- Tracking Defects, Selecting Test Cases for **Regression Testing**.
- **Sanity Testing, Regression Testing** on modified Software.
- Knowledge in end to end **functional** and **regression testing** of applications, including requirements understanding, **test case** and **scenario** development, test execution, results analysis and **sign off**.
